What makes this collection unique:

- “Select & Better” grade highlights the clean, natural beauty of premium White Oak.
- A true “Rift & Quartered” cutting process unlocks the straight grain and unique flecking patterns hidden within the tree.
- Long lengths up to 10’ fill a room with fewer cuts and joints.

What makes Graf Custom Hardwood unique is the high level of craftsmanship that goes into every product. They're passionate about the craft and figuring out how they can push the industry beyond its current limits.

Graf Custom Hardwood goes above and beyond to make sure that they have near

perfect raw material. Being nestled in the foothills of Appalachia, with all its natural beauty and resources, gives a surplus of top-class White Oak, Red Oak, and Walnut.

All of Graf's collections—Solid, Engineered, Prefinished, and Style—start with logs sourced from within 400 miles of the mill.
