

The Longhouse Plank Collection

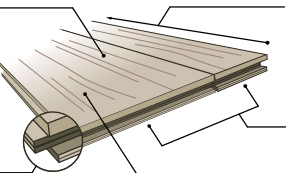

CUMBRIA

Naturally Enduring

The use of timber planks in home construction originated in the earliest cultures all around the world in longhouses. This enduring usefulness and adaptability of lumber inspires this collection of European Oak plank flooring. By utilizing multiple widths and live sawn planks we make the best use of our lumber, just as the early builders did, to create a modern version of a bygone craft. Richly imbued with time-worn textures, milling marks and natural tones. The Longhouse Plank Collection updates the ancient for today's home.
